PROFESSIONAL SUMMARY

MERN Stack Developer experienced in building scalable web applications with MongoDB, Express.js, React.js, and Node.js. Skilled in designing secure RESTful APIs, implementing JWT authentication, and delivering responsive UIs with Tailwind CSS and Bootstrap with a focus on performance and clean integration.

SKILLS

- Frontend:** HTML, CSS, Tailwind CSS, Bootstrap, React.js, Next.js, State management
- Backend:** Node.js, Express.js, REST API Development, MVC architecture
- Authentication:** JWT Authentication, Authentication & Authorization
- Database:** MongoDB, Mongoose, CRUD operations
- Tools:** Git, GitHub, Postman
- Concepts:** Error Handling, API Integration, MVC Architecture
- Other:** Full-stack development, Deployment (VPS)

WORK EXPERIENCE

MERN Stack Developer (Zaikest) — 2025 - Present

- Developed and maintained a scalable MERN-based e-commerce platform (Zaikest), improving performance and user experience.
- Developed and maintained MERN stack web applications, enhancing user experience and functionality.
- Designed and implemented RESTful APIs to support frontend features, improving data flow and integration.
- Integrated JWT authentication to secure user data and sessions, increasing application security.
- Created responsive, mobile-friendly user interfaces using Tailwind CSS and Bootstrap, improving accessibility across devices.
- Optimized application performance and scalability, reducing load times by 20%.
- Managed version control and collaboration using Git and GitHub, streamlining development workflows.
- Conducted API integration and debugging to ensure seamless data communication between services.
- Built frontend interfaces using HTML, CSS, JavaScript, and React.js, delivering intuitive user experiences.

PROJECTS

E-commerce Web Application (<https://zaikest.com>)

- Developed a scalable full-stack MERN e-commerce platform with an admin dashboard.
- Implemented product management, cart, checkout, and an order processing system.
- Built secure authentication and authorization using JWT.
- Designed RESTful APIs for users, products, and orders.
- Integrated payment gateway and inventory APIs to ensure reliable transactions.
- Improved performance by 30% through optimization techniques, achieving faster page load times.
